PROFESSIONAL SUMMARY

Senior Security Service & Surveillance Technician with 20+ years of hands-on experience supporting live surveillance and electronic security systems in high-availability, regulated and continuously operating environments. Expert in enterprise CCTV, access control, intercom and IP network infrastructure, with a strong record of complex fault diagnosis, preventative maintenance and camera/image optimisation on live systems. Background includes ownership of a private electronics business in Greece (2003–2015), covering telecommunications, CCTV, network infrastructure and municipal broadband (MAN) deployments.

CCTV & Surveillance	Dahua · AXIS · Hikvision · Vivotek · Wisenet · Nx Witness
Access Control & Intercom	ICT Protege WX · Inner Range · FDi Systems · Urmet IP · Dnake IP Video Intercom
Alarm Systems	Bosch · Ajax Systems · Fault Diagnosis · Preventative Maintenance · System Commissioning
Networking	Cisco · Fortinet · TP-Link · MikroTik · Ubiquiti · SD-WAN · VPN/Firewalls · VLANs & Segmentation · Wireless Site Surveys
Field & Service	Senior-Level Troubleshooting · Camera & Image Optimisation · WHS Compliance · Technical Reporting
Enterprise Environments	Live System Maintenance · High-Availability Sites · Regulated Environments · Documentation
AI & Automation	ChatGPT · Claude / Claude Code · Python · n8n · GitHub · Prompt Engineering · Web Development

PROFESSIONAL EXPERIENCE

Security Systems Technician (Subcontractor)

2026 – Present

Self-employed

Gold Coast, QLD, Australia

- Subcontract service, fault diagnosis and maintenance of CCTV/surveillance, access control, intercom and alarm systems for security integrators and clients across South-East Queensland.
- Installation, programming and commissioning of IP-based security and network infrastructure, with technical reporting to the client.

Senior Security Service Technician

2023 – Jun 2026

Urmet Australia (formerly Epsilon Security / SUPATECH)

Loganholme, QLD, Australia

- Service, fault diagnosis and resolution of surveillance and electronic security systems across 10–30 commercial and residential sites, managing 50–100+ devices per site on average.
- Troubleshooting and maintenance of enterprise CCTV/surveillance, access control, intercom and IP network infrastructure.
- Preventative maintenance including camera inspections, equipment replacement, system adjustments and image optimisation.
- Diagnosing complex faults on live systems while maintaining continuous operation and system availability.
- Upgraded Meriton Suites Southport to Network Optix Nx Witness, including 280+ cameras across the 55-storey Sundale tower.

- Providing technical support to service, network and project teams; preparing technical reports and compliance documentation.

Security Service Technician

May 2016 – May 2023

Urmet Australia (Epsilon Security)
Mascot, NSW, Australia

- Service and maintenance of CCTV/surveillance, access control, alarm and intercom systems across major residential precincts in Sydney and Canberra (Opal Tower, Granville Place, Burwood Grand, WOVA and more).
- Troubleshooting IP cameras, VMS platforms and network-related issues; programming and support of Urmet intercom and IP-based systems.
- Subcontractor on projects for Amazon, Fredon and Next Security.
- Installation, testing and commissioning of surveillance and terminal devices.

Owner / Electronic Systems Technician

2003 – 2015

Antenna Stores – Private Business
Heraklion, Crete, Greece

- Installation and maintenance of CCTV, telecommunications, antenna and alarm systems in residential, commercial and industrial environments.
- Design, implementation and maintenance of network infrastructure; end-to-end technical support and customer management.
- Development of municipal broadband infrastructure with specialisation in Metropolitan Area Networks (MAN), including high-speed wireless and fibre-optic Point-to-Point links interconnecting public buildings.
