PROFESSIONAL SUMMARY

Senior Security Service & Surveillance Technician with strong hands-on experience supporting live surveillance and electronic security systems in high-availability environments.

Experienced in enterprise CCTV systems, fault diagnosis, preventative maintenance and camera optimisation, with solid knowledge of IP-based video networks.

Proven ability to respond to incidents, support operational teams and maintain system reliability in regulated and continuously operating sites.

Background includes ownership of a private electronics business in Greece (2003–2015), providing a broad foundation across telecommunications, CCTV, network infrastructure and customer support.

PROFESSIONAL EXPERIENCE

Senior Security Service Technician2023 – Jun 2026

Urmet Australia (formerly Epsilon Security / SUPATECH)

Loganholme, QLD, Australia

- Service, fault diagnosis and resolution of surveillance and electronic security systems across 10–30 commercial and residential sites, managing 50–100+ devices per site.
- Troubleshooting and maintenance of enterprise CCTV, access control, intercom and IP network infrastructure.
- Preventative maintenance including camera inspections, equipment replacement and image optimisation.
- Diagnosing complex faults on live systems while maintaining continuous operation and system availability.
- Providing technical support to service, network and project teams.
- Preparing technical reports and documentation for management and compliance purposes.

Security Service TechnicianMay 2016 – May 2023

Urmet Australia (Epsilon Security)

Mascot, NSW, Australia

- Service and maintenance of CCTV, access control, alarm and intercom systems.
- Troubleshooting IP cameras, VMS platforms and network-related issues.
- Programming and support of Urmet intercom and IP-based systems.
- Subcontractor on projects for Amazon, Fredon and Next Security.
- Installation, testing and commissioning of surveillance and terminal devices across major residential and commercial sites in Sydney and Canberra.

Owner / Electronic Systems Technician2003 – 2015

Antenna Stores – Private Business

Heraklion, Crete, Greece

- Inspection, evaluation and installation of telecommunications, antenna and alarm systems.
- Installation and maintenance of CCTV systems in residential, commercial and industrial environments.
- Design, implementation and maintenance of network infrastructure.
- Development and deployment of broadband infrastructure at municipal level (Metropolitan Area Networks).
- Configuration of high-speed Point-to-Point wireless and fibre optic links for public infrastructure.
